Skills

Web Development Frameworks:

Node.js, React.js

Ruby on Rails

Front-End Development:

React Native

AngularJS

HTML, CSS, Bootstrap

Database Management:

With my expertise in Node.js and React.js, I led backend solutions at ELIGO APPTech PRIVATE LIMITED, improving database performance by 40% and cutting deployment time by 70%. My ability to produce high-availability apps is demonstrated by my collaborative style and mastery of CI/CD pipelines, which combine technical know-how with teamwork.

Education

2016-10 - 2018-05 **Bachelor of Science: Computer Science**
VISHWAKARMA COLLEGE OF ARTS, COMMERCE & SCIENCE - Sr.No. 3/6 VIIT Campus, Laxmi Nagar, Kondhwa(BK) P

Work History

2021-01 - Current **Software Developer**
ELIGO APPTech PRIVATE LIMITED, Pune, Maharashtra

- Built a Node.js backend application for RouteDeck, running on Kubernetes and with powerful RESTful API's as well as database integrations to handle 10K+ daily transactions at 99.9% uptime. Backend development.
- Built a Kubernetes-based production infrastructure that utilized deployments, services and ingress controller(s) to manage traffic routing effectively. Incorporated autoscaling and liveness/readiness probes to guarantee high availability.
- Constructed DueDeck's backend, constructing robust Node.js API for invoice processing, payment gateway integrations, and tax calculations that cut down on manual processing by 60%.
- Improved database performance by optimizing connection pooling, query optimization, and indexing techniques, resulting in 40% faster query response times and better application reliability.
- Developed GitLab CI/CD pipelines for automated deployment, including staging and production environments with automated testing, leading to zero-downtime deployments and a 70% reduction in the deployment time.

MySQL

MongoDB

Redis

Version Control:

Managing source code

Collaborating with teams

Branching and Merging

Scripting and Automation:

Bash Scripting

Python Scripting

Containerization:

Building, deploying, and
managing containers

orchestrating containerized
applications

CI/CD Pipelines:

Setting up and managing
continuous integration and
continuous deployment
pipelines to automate the
software release process

Security & Compliance:

Implementing Security Best
Practices

Network & Load Balancing:

Understanding network
protocols

Managing Traffic

Personal Details

Date of Birth: 06/12/1997

Nationality: Indian

2017-11 -

2018-05

Software Developer Intern

QSET, Pune, MH

- Contributed to development of web applications using Ruby on Rails framework .
- Designed and implemented RESTful APIs for web applications.
- Utilized database technologies including MySQL and PostgreSQL
- Handled deployment processes in OS instances, ensuring that environments were correctly configured for production.

Freelance Projects

- **GetYouVendor:** Architected and deployed a full-stack service vendor platform.
- **Buyol (Hyper-local Market Application):** Led development on this **Ionic Framework** and **AngularJS** platform.
- **Scholify:** Delivered a React Native application for assignment management, integrated with a Node.js backend.
- **Website Scanner (Cybersecurity Proof of Concept):** Developed a proof-of-concept web vulnerability scanner using **Metasploit** with **Python** and **Laravel**. This project was designed to identify web application vulnerabilities and improve overall system security, demonstrating advanced cybersecurity knowledge.
- Developed a PHP desktop application for client resource management, handling all aspects from design (UI/UX and database schema) to coding, testing, and deployment, **resulting in a 20% improvement in resource management efficiency** and enhanced client satisfaction.
- Designed and developed a PHP desktop application for Madhavamrut Ayurvedic clinic to **streamline prescription management**, encompassing the entire development lifecycle, from conceptualization and database design to coding, testing, and deployment, facilitating more efficient patient care and record-keeping.

Marital Status: Single

Gender: Male

Certifications

Currently preparing for the Certified Information Systems Auditor (CISA) exam

Personal Projects

- Developed a **speech recognition app** using **Whisper from OpenAI** and Python, focused on offline real-time speech-to-text conversion.
- Implemented a **pull-based mechanism** using **Python scripting** for automated code deployments.
- Created a **materialized view system in MySQL** using Python scripting to emulate materialized views, enhancing query performance.
- Built a **Wi-Fi-based attendance system** using **Raspberry Pi**, enabling automated employee check-ins via Wi-Fi detection.
